

STOKES MICROVANE 14-52 SERIES

Rotary vane vacuum pumps

STOKES[®]
VACUUM

stokesvacuum.com

For over 100 years, the Stokes Vacuum have offered time-tested, proven performance with experienced service and technical support you can rely on. Stokes vacuum pumps are designed to meet the toughest demands with minimal maintenance and maximum uptime.

We now launch the Stokes Microvane Series rotary vane vacuum pumps. With low noise, virtually zero emissions, and up to three years of maintenance-free operation, Microvane pumps deliver reliable vacuum performance with less hassle. Thanks to an integrated exhaust filter operating at optimal temperature eliminates corrosion risks and performance loss associated with external filters.

The Stokes Microvane 14–52 Series rotary vane vacuum pumps deliver a modern, compact solution for clean, quiet, and reliable vacuum generation. Engineered for continuous duty from rough to fine vacuum, the Microvane series of pumps are built to minimize environmental impact, reduce operational costs, and extend service intervals. Designed for ease of use and durability, they offer a truly effortless vacuum solution across a wide range of industrial applications.

Ultra-quiet performance
Operates as low as 52 dB(A) for a quieter, more comfortable working environment.

Up to 1 year / 8000hr maintenance-free
Long service intervals mean less downtime and lower total cost of ownership.

Compact and rugged design
Built for demanding industrial environments - small in size, big on durability.

No external exhaust filter required
Simplifies installation and reduces total system footprint.

Integrated exhaust filtration
Reduces oil loss and keeps your work environment cleaner.

Energy-efficient operation
Delivers up to 20% energy savings, helping you lower operational costs.

Fully adaptable to your application
Offers flexibility through a range of accessories designed to optimize performance and simplify integration.

- Compatible with external frequency converters for single-phase power supply, monitoring, and control
- Optional adapters available for system integration with primary or booster pumps
- Service indicators monitor key parameters such as oil level, temperature, and filter status

Quiet performance by design
Enhances workplace comfort without sacrificing performance.

- Low acoustic impact, the pump operates as quietly as 52 dB(A)
- Ideal for noise-sensitive environments such as laboratories, cleanrooms, and production floors
- Reduces noise pollution and supports compliance with workplace sound level standards
- Quiet operation without sacrificing vacuum power or efficiency

Cleaner technology built-in
Engineered for cleaner, more efficient operation with minimal maintenance.

- Integrated exhaust filtration is built directly into the oil casing, reducing system complexity and installation time
- Sealed internal design virtually eliminates oil loss and prevents smoke emissions - no external exhaust filter required
- Optimized pump temperature enables condensation-free vapor pumping, protecting internal components and maintaining process reliability

Up to 1 year maintenance-free
Designed for long life and minimal maintenance, the Stokes Microvane Series keeps operations running smoothly.

- Up to 1 year of maintenance-free operation in clean applications
- Advanced sealing and lubrication technology reduces internal wear and tear
- Low oil consumption helps cut operating costs and environmental impact
- Optimized thermal management maintains stable performance and extends component life
- Fewer service interventions mean more uptime and lower total cost of ownership

Applications

- Coating
- Pharma freeze-drying
- Vacuum drying
- RAC (Refrigeration and Air Conditioning)
- Oil degassing
- Industrial freeze drying
- Chemical processes

Technical Specifications

	Units	Microvane14	Microvane20	Microvane33	Microvane52
Rated pumping speed	cfm	13	19	31	50
Eff pumping speed	cfm	10	16	27	43
Ult pressure w/o gas ballast/opening	mbar	$< 8 \times 10^{-3}$			
Ult pressure with gas ballast	mbar	$< 1 \times 10^{-1}$			
Water vapor tolerance	mbar	10			
Motor power					
3-phase motor at 60 Hz	kW	0.7	1.1	1.5	2.6
Noise level	dB(A)	54		57	
Oil volume (Approx.)	l	1.5		3	
Flanges		25 KF		40 KF	
Weight (Net approx.)	kg	42	48	80	88
Dimensions approx. (L x W x H)	mm	516 x 288 x 294	518 x 288 x 294	632 x 356 x 320	669 x 359 x 320

Ordering Information

	Microvane14	Microvane20	Microvane33	Microvane52
3-phase world motor 80...264 / 342...506 V, 60 Hz	A35137791	A35137792	A35137793	A35137794
Oil level switch	9700LS			
Exhaust filter over-pressure switch	971471210			
Exhaust filter pressure manometer	95193			
Thermal switch to protect the pump from overheating	9700TS			9700TS65
PT100 for pump temperature monitoring	N/A		971444320	
1-phase driven F/C 180 - 264V, 60 Hz with overload protection	970FC01			
Roots adapter for close-coupled Roots mounting up to 500 m³/h	N/A		970RA02	970RA01
Pump Service Indicator & cables Pump sensors (oil level, oil temperature and exhaust filter condition) not included	N/A	9700F1 & 9700F1C1	9700F1 & 9700F1C2	

Service solutions

We offer a full complement of vacuum pump services, including commissioning, genuine spare parts and oil, remanufacturing, service exchange, field services, and managed maintenance.
